FOR IMMEDIATE RELEASE

**California Moving & Storage Association members are helping Special Olympics Southern California (SOSC) change lives!**

As part of a dynamic partnership, members of CMSA have been donating storage space to local Special Olympics programs, allowing them to save money on storing event supplies and equipment. This generous donation in turn allows Special Olympics to put those saved dollars towards providing free programs to over 13,000 athletes throughout Southern California! SOSC President and CEO, Bill Shumard says, "It is because of partners like CMSA that persons with intellectual disabilities can realize the rewards of participating in sports."

Special Olympics is dedicated to empowering individuals with intellectual disabilities to become physically fit, productive and respected members of society through sports training and competition.

A very special thank you to the generous members of CMSA who have opened their facility to store local Special Olympics equipment and supplies.
